Our Services

Staff Augmentation & Outsourcing

We provide comprehensive staff augmentation and outsourcing services tailored to your business needs.

IT Staff Augmentation: We provide IT staff augmentation services to help businesses enhance their workforce with skilled professionals on a temporary or project-based basis.

Software Development Outsourcing: We offer comprehensive software development outsourcing services to assist businesses in leveraging external expertise for efficient and high-quality software solutions.

Business Process Outsourcing (BPO): We specialize in providing extensive Business Process Outsourcing services to help companies streamline their operations and achieve greater efficiency.

IT Consultancy: Gain access to a pool of experienced professionals in various IT domains. Maximize your project's potential and achieve success with our trusted team of consultants.

How We Work

Our Simple and Straightforward Staff Augmentation process to cater our clients.

Requirement Gathering

We start by understanding your project requirements, timeline, and budget.

Find Potential Candidates

Based on the project requirements, we identify potential candidates from our pool of experienced developers with the required skills and expertise.

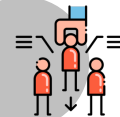

Finalizing Service Agreement

Once you've selected a candidate, we'll provide you with a detailed Master Service Agreement. This will include a timeline, the cost, and the scope of work.

Schedule Interviews

Conduct interviews to identify and onboard skilled professionals who align with your specific project requirements.

Resource Onboarding

We provide a comprehensive onboarding process to ensure that the developer has the necessary resources to begin working on the project efficiently.

Licensing Services for all your Business Needs

Our experts help you choose the right tools to streamline your business and optimize your software investments.
